CLİPPİNG TOOL

USAGE AREAS AND FEATURES

1. Connection and fixing works between steel mesh and springs of products such as beds, sofas, armchairs, razor wire
2. The clips applied with this gun eliminate noise by preventing the wires from loosening, and since they have an oval structure, they do not damage the surrounding materials.
3. It increases work efficiency with its simple use, fast and low repair rate.
4. It reduces spare parts consumption with its design features, simple and robust structure.
5. It provides working time efficiency as it has a design model with the lowest probability of part jamming in the jaws

Not: gun hanger elements are sold optionally, Malfunction types and repair methods are sent with the gun.

Working air pressure is should beset to 6 bar
